CHANDAN JHA

Frontend Developer

+91 8699762755 | chandanjha2714@gmail.com | Punjab, India

PROFESSIONAL SUMMARY

Results-driven Frontend Developer and BCA student with hands-on experience building responsive web interfaces and deploying machine learning solutions. Proficient in HTML, CSS, JavaScript, Python, and PHP, with a track record of shipping projects including an ML-based heart disease predictor and a full-featured restaurant menu website. Awarded 2nd place in an inter-college PHP-MySQL coding competition. Actively seeking a developer role to contribute technical skills and grow within a collaborative team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), jQuery, Responsive Design, CSS Flexbox, Media Queries
Programming: Python, PHP, MySQL
ML & Data: Scikit-learn, Pandas, NumPy, Matplotlib, TF-IDF / NLP, Logistic Regression, Random Forest, Naive Bayes, SVM
Tools: Jupyter Notebook, Microsoft Office, Microsoft Power BI, Git

PROJECTS

Heart Disease Prediction System | Python · Scikit-learn · Pandas · NumPy 2024

- Built an end-to-end ML pipeline for cardiac risk classification using Logistic Regression and Random Forest on clinical datasets.
- Applied data preprocessing and feature selection techniques, achieving high prediction accuracy on held-out test data.
- Visualized model performance and feature importance using Matplotlib; documented results in Jupyter Notebook.

Smart Restaurant & Hotel Menu Website | HTML · CSS · JavaScript 2024

- Designed and developed a fully responsive digital menu platform optimized for desktop, tablet, and mobile viewports using CSS Flexbox and Media Queries.
- Implemented interactive UI features — collapsible menus, smooth navigation, and category browsing — with vanilla JavaScript.
- Delivered a production-ready interface with item descriptions, images, and pricing; showcasing end-to-end frontend development ownership.

Email Spam Detector | Python · NLP · Scikit-learn 2023

- Developed a text classification pipeline to label emails as spam/ham using TF-IDF vectorization for feature extraction.
- Trained and compared Naive Bayes, SVM, and Logistic Regression models; selected Multinomial Naive Bayes as final model achieving 92% accuracy on the test set.
- Demonstrated end-to-end ML workflow: data ingestion, text preprocessing, model evaluation, and performance reporting.

EDUCATION

Bachelor of Computer Application (B.C.A.) | PCTE Group of Institute, Ludhiana 2023 – 2026
Relevant coursework: Web Development, Database Management, Data Structures, Machine Learning

12th Grade – PSEB | Govt Public Senior Secondary School, Ludhiana 2022 – 2023
Score: 67%

10th Grade – PSEB | St. Patric Public Senior Secondary School, Ludhiana 2020 – 2021
Score: 76%

TRAINING & CERTIFICATIONS

Diploma in Computer Application (DCA) | FIMT Group of Education, Ludhiana

Data Science Program | DUCAT, Ludhiana

ACHIEVEMENTS & ACTIVITIES

- 2nd Place — Coding Competition (PHP-MySQL), Tech Disha Inter-College Event
- Participant — Robomania Inter-College Robotics Event
- Participant — Business Quiz Inter-College Event
